**PRODUCT #: N2551**

# *FoamFREE™ 940*

Foam Control for Aqueous Developers

**DESCRIPTION:** A highly effective foam suppressant for aqueous developing and stripping of DuPont™ RISTON® photopolymer films. *FoamFREE 940* is a stable product which efficiently disperses foam in low concentrations.

**BENEFITS:**

- **No silicone**
- **Effective in alkaline solutions**
- **Easily rinsed**
- **Effective at low concentrations**

**SPECIFICATIONS:**

<b>Density:</b>	1.02 gm/ml
<b>Flash Point (TCC):</b>	>200° F
<b>Shelf life:</b>	Indefinite

*FoamFREE 940* is very effective at low concentrations, and should be used at 5-10 ml/gal. Typically, a small portion of the defoamer requirement is added to the initial bath make-up and small additions are made to the sump when foam exceeds the acceptable level.

**INSTRUCTIONS:** *FoamFREE 940* can be added directly to the sump, drip fed, or metered into the machine. Do not add to static holding tank, (day tank) as it will separate from solution when not actively mixed.

**CAUTION:** Use of excessive quantities or mis-application of any antifoam can result in re-deposition and/or accumulation of residues on panels or in equipment. Do not add *FoamFREE 940* to a day tank or holding tank.

**DISPOSAL:** Non-hazardous material; normally may be flushed to drain. Follow federal, state and local regulations.

This product should be used only for its intended purpose. The information stated above is based on our laboratory tests and experience, and is accurate to the best of our knowledge.
